BFX | EASYLIFT

Quick Access to All of the Bed. Counter balanced on torsion bars and gas springs, a five-foot tall woman can easily open and close it.

Outstanding Security. The patented locking system, steel perimeter, rotary latches and barrel lock cylinder cannot be jimmed.

Robust Construction. The composite cover is framed in a 12-gauge steel lift assembly. All moving parts are on bearings. Steel parts are zinc plated.

Drive 75 MPH with the cover raised to haul bulky cargo.

Higher Fuel Economy. Hard covers improve the drag coefficient of a pickup, usually resulting in a 1 to 1.5 miles increase per gallon. Available only for Ford and GM pickups.

Composite Top will Outlast your Truck because it's superior to steel and aluminum. BFX Easy Lift Composite covers are designed to be durable, with no fillers added to the resin.

Shade at the Job Site complies with Cal-OSHA 3395

Qualifies for Factory Commercial Up fitting Credits. Ask your Ford or GM dealer before you buy or lease a new truck and save up to \$500.
